Faculty of Business and Economics University of Pecs

Summary of Aims

- An introduction to the area of ' migration health economics' to build capacities for ***creating migrant responsive systems***
- Field deserves an ever growing attention for developing sustainable economic systems.

Outcomes:

- **Intermediate level competences** for critical analysis, planning and implementation of economic policy programs from migration health related perspectives and paradigms

Key Terms and Concepts

- SYSTEM OF THE ECONOMY: IMPLICATIONS OF INTEGRATION AND MOBILITY DYNAMICS
- MAKING SENSE OF ECONOMIC INDICATORS AND MOBILITY
- COST-BENEFIT ANALYSIS OF MIGRATION AND HEALTH RELATED DEVELOPMENT PROGRAMS
- SUSTAINABLE WELL-BEING AS AN OUTCOME OF APPROPRIATELY DESIGNED PROGRAMS EMBRACING MIGRATION AND MOBILITY FOR THE HOST AND SENDING COUNTRIES IN THE INNOVATION DRIVEN ERA

Predominant Mode: Lecture and Seminar

- Self Learning and self reflection encouraged
- Case based teaching used
- Appreciative Inquiry Techniques applied
- Combination of Experiential Learning, Action Research and Action Learning supported
- Triple Loop Learning targetted

Assessment

- Participation-CEPAQ
Consistent Ethical, Proactive, Appreciative Inquiry Approach, Quality
- Research and an Own Case
- Midterm Open book
- Presentation -Paper
- Final Open Book
- Course Project
- Reflective Overview (self learning, conscious learning)

Knowledge Outcomes (1)

- The system of economy, basic mechanisms, goals and set-up **-the value of health, knowledge and mobility in the system of economy**
- The main essence of **economic policy and public health policy in the field of migration**. The content (aims –outcomes-indicators), context, processes and actors
- Conceptual Models of Migration Economics
- Migration related Plans and Programs in the centralized and decentralized contexts of transition
- **The concepts underlying the valuation methods:** opportunity costs of financing migration health programs, the approaches to assessing WTP , CBA, vs.QALY, DALY, YLL, DRG

Professional Competence to (2)

- Analyze Health-Economic Indicators -relationships with migration
- Critically analyze and interpret policy plans, development programs. Design ,defend alternative development programs, modes of financing
- Conduct Cost-Benefit Analysis of field related development programs. Estimate return on migration
- Apply an integrated perspective in analyzing and evaluating local, regional and global migration health aspects of economic policies and programs
- To distinguish and apply in a systematic manner the theoretical and empirical concepts related to
Migration Health Economics

Improving Personal Abilities (3)

- Empathy and emotional skills in **sensing special health and economic needs of culturally diverse groups of migrants**
- Communication skills specific and indispensable to work in multi-cultural settings. *Respecting the importance of co-learning*
- Leadership and cooperation skills specific to diverse settings
- Sensibility to creative mediation within the paradoxical conditions
- Self Initiative, personal responsibility and altruism in professional practice. Commitment to evidence-based practice
- Openness to active life-long learning, self learning, knowledge sharing
- Ability to advance general human and minority rights, and social justice in migration health

Key Terms and Concepts

- SYSTEM OF THE ECONOMY: IMPLICATIONS OF INTEGRATION AND MOBILITY DYNAMICS
- MAKING SENSE OF ECONOMIC INDICATORS AND MOBILITY
- COST-BENEFIT ANALYSIS OF MIGRATION AND HEALTH RELATED DEVELOPMENT PROGRAMS
- SUSTAINABLE WELL-BEING AS AN OUTCOME OF APPROPRIATELY DESIGNED PROGRAMS EMBRACING MIGRATION AND MOBILITY FOR THE HOST AND SENDING COUNTRIES IN THE INNOVATION DRIVEN ERA
